INFORMATION

Soft Launching Indonesia's First Halal Scanner HALIV

On May 24th 2022, Vice President Ma'ruf Amin soft-launched Indonesia's first-ever Halal Scanner application HALIV (Halal Living) at Halal Industry Event 2022. This event was held alongside the inauguration of The State of the Global Islamic Economy Report (SGIE Report) 2022. In the face of Indonesia's growing product diversity, HALIV is a one-stop application to cater practical solutions regarding halal concerns.

As one of the software made by Halal Product Guarantee Agency (Badan Penyelenggara Jaminan Produk Halal/BPJPH), HALIV Application aims to provide a secure and trouble-free scanner that provides halal information on various products. To use its functions, users must first download the application and register (if they haven't already). User may simply input their email address or cell phone number.

In order to use the application, users can simply follow the following steps:

1. By using keywords. Users may click the search box and enter the desired product keywords.
2. By using a barcode scan. Users may click the scan column and point their cell phone camera at the product barcode.
3. By using the product picture. Users may click the column for cameras and point their camera on the logo or front/rear/side view of the product.

For your reference, please check the official website of HALIV in the link [here](#).
